

# Best and Worst Selling Premier League Teams

We created a Player Value Index (PVI) to see which Premier League clubs got the best deals when selling players over the last ten years. By comparing transfer fees to the players' market values, PVI shows which clubs sold players for more than they were worth and which sold for less

PVI > 1: The club sold the player for more than their market value, indicating an overperformance in the transfer market.  
PVI < 1: The club sold the player for less than their market value, indicating an underperformance.

## Above Market Movers: Clubs Outperforming in Player Sales

## Falling Short: Clubs Selling Below Market Value

## Overachievers: Players Sold Far Above Market Value
